Diagnosis & Treatment

Better Chance of Not
Having Long-term Pain

Did you Know...

Motor vehicle collisions can cause severe spinal ligament damage that is commonly missed by doctors?

Spinal
Bone

Spinal
Disc

Torn Spinal
Ligament

Spinal ligament injuries can result in life long problems such as chronic pain, degenerative spinal arthritis and loss of your quality of life. These injuries often do not cause severe pain, only soreness and pain that commonly goes away after a few weeks, only to repeatedly "flare up" when you try to do something physical like lift, play with your children or work. Make no mistake, these injuries can cause long-term pain and impairment for a lifetime.

The New "MRI" When It Comes To Spinal Sprain

New computer technology now allows our board certified medical radiologist to analyze x-rays of the spine and determine if you have spinal ligament damage. Your results are graded using the highest standard, the American Medical Association 5th edition impairment guides. Spinal ligament injuries carry up to a 28% whole person impairment, and can have very serious short and long term consequences to your health. Demand spinal ligament testing if you are involved in a motor vehicle collision.

Attorneys, Adjusters and the Medical-Legal Arena

Spinal ligament injuries are very serious injuries that must be documented properly and understood by you, insurance adjusters and attorneys. If you were involved in a motor vehicle collision and had any soreness in your neck or lower back, you need to be evaluated to see if computerized spinal ligament testing is appropriate for you. Dr. Shook personally teaches attorneys and insurance professionals about spinal ligament injuries because it is an epidemic problem that is largely misunderstood and misdiagnosed.

So What Can You Do?

If you were recently in a motor vehicle collision call our office for a consultation to see if we can help. Dr. Shook is highly trained in the triage, diagnosis and treatment of motor vehicle collision injuries, and works with a team of medical specialists to help you get the care you need. Dr. Shook is currently writing a book for patients, attorneys and insurance professionals on motor vehicle collision injuries. Don't put your future health at risk, and get your spine checked.
